## DETAILED ACTION

### *Specification*

1. The amendment filed 6/22/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

“action list 48 stored on the database 20 under a user’s account can be downloaded to the user’s camera 14 ...” (specification amendment on 6/22/06);

“receiving from the server the image identifiers assigned for each of the captured images and **action information including at least one action that can be applied by the server to the uploaded images;**” (claim 1);

“downloading action information to the image capture device including at least one action that can be applied by the server to the uploaded images;” (claim 22)

Applicant is required to cancel the new matter in the reply to this Office Action.

2. The disclosure is objected to because of the following informalities:

Corresponding patent number information for the “RELATED APPLICATIONS” section has not been updated.

09/625,824 is now U.S. Pat. No. 6,636,259

09/626,418 is now U.S. Pat. No. 7,117,519.

Appropriate correction is required.

3. The abstract of the disclosure is objected to because the amended Abstract is not on a separate sheet. Correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 112***

4. Claims 1 – 8 and 22 – 32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The terminology “downloading action information to the image capture device including at least one action that can be applied by the server to the uploaded images” (claims 1 and 22) is not in the original specification.
